

HUSQVARNA 1-8D

HUSQVARNA INTRODUCES NEW 1-8D PUSH-BEHIND SHOT BLASTER

The Blastrac 1-8D walk-behind shot-blasting machine is our most compact walk-behind shot blaster, making it ideal for smaller jobs. The machine is easy to operate and transport thanks to its versatility and manoeuvrability. Use the powerful and durable Blastrac 1-8D to effectively clean and prepare concrete surfaces before applying a new coating, removing lines or cleaning cracks. The shot blaster is pushed forward when operating and is therefore capable of reaching corners and small spaces.

FEATURES

WORK VIRTUALLY DUST FREE

The shot blaster has to be connected to a Husqvarna industrial dust extractor to create a closed circuit. This means that you are able to work virtually dust free, creating a better working environment.

EASY TO OPERATE AND CONTROL

The machine comes with an on/off switch and handle to open and close the shot valve. Designed for easy operation and minimal room for operator error. It also comes with one swivel caster in front and two fixed wheels at the back for more precise control.

POWERFUL AND DURABLE

The shotblaster comes with a heavy-duty blast wheel, a single-phase motor, belt drive and long-life bearing unit.

RESOURCE-SMART SOLUTION

Reusing the abrasives makes this a resource-smart solution. Also no water is used and wasted and no chemicals are used during the blasting process.

TECHNICAL DATA HUSQVARNA 1-8D

Art.no: 970 79 36-01 SHOT BLASTER BLASTRAC 1-8D | 220-230 V | 50 Hz | 1 ph | EU

ENGINE

Rated power	2.2 kW
Required current	14,5 A
Rated voltage	220-230 V
Frequency	50 Hz
Number of phases	1 ph

SHOT BLASTING EQUIPMENT

Working width	203 mm
Steel shot consumption	75 g/m ²
Type of operation	Push

DIMENSIONS & WEIGHTS

Dimensions (L x W x H)	1200 x 315 x 1150 mm
Weight (without side packed article)	102 kg
Dust hose connection	51 mm

NOISE & VIBRATION

Noise level at operators ear	87 dB(A)
Vibration level	Less than 2,5 m/s ²
