

ELITE-POLISH™ EP EDGE D

BEAUTIFUL EDGES MADE EASY

Elite-Polish™ EP Edge D is our finest professional polishing tool designed specifically for dry edging work with handheld machines. Meticulously crafted for outstanding performance, the tool allows you to achieve beautiful results with minimal pressure.

HIGH GLOSS. MINIMAL EFFORT.

The edging ring's many design enhancements include segments that are inclined so that the outer part is the first to touch the floor. This allows you to create more refined edges and get closer to walls, while also extending the tool's life by balancing wear. The size of the VELCRO® brand backing has been doubled to ensure strong tool retention during use, while an ABS disc increases tool resistance.. And, thanks to a full range of available grit sizes, you can follow the same process for edges as you do with the rest of the floor. Its gold performance level makes Elite-Polish™ EP Edge D ideal for demanding professionals looking to achieve maximum gloss in as few steps as possible. Manufactured and quality-tested by Husqvarna.

FEATURES

HIGH GLOSS EFFICIENCY

Compared with other polishing pads, this series results in higher gloss and clarity levels achieved in only one pass. This allows you to save time and tooling, resulting in a lower cost/m² as well as a higher gloss level.

EXCELLENT PERFORMANCE AT HIGH RPM

VELCRO® brand backing provides strong tool retention at high rpm and allows resin pads to be switched easily between different tool sets.

BEAUTIFULLY REFINED EDGES

Specially designed to allow you to get as close as possible to the wall for beautifully refined edges.

MINIMAL PRESSURE REQUIRED

Carefully engineered to enable you to achieve the desired result with minimal effort.
