

HUSQVARNA A 45 FILTERS

GENUINE AIR-CLEANING PERFORMANCE

The A 45 is part of our latest generation of air cleaners. A single A 45 unit can cover an area up to 45 m^2 in size, and multiple units can be combined for optimal air cleaning of larger spaces.

The A 45 air cleaner comes with an H13 filter and pre-filter as standard. An active carbon filter is available as an option. The air cleaner will tell you when to replace the filters, but our general recommendation is to replace the H13 filter every 12 months and the pre-filter every day. For reliable performance and to keep warranty, use only Husqvarna genuine filters.
