PERFORMANCE LINE

High Performance. Effective Snow Removal.

The Øveraasen UTV 530 Performance Line snow blower have been designed for high capacity, high performance and economical use. This snow blower is ideally used at airports and on the roughest mountain passes.

Based on the two-stage snow clearing system, the snow blower is capable of clearing any kind of snow under all weather conditions.

The main advantages with this type of snow blower is it's compact and powerful design, high clearing capacity, good casting performance, economical operation and operational flexibility.

The Øveraasen UTV 530 Performance Line snow blower is designed to be used in combination with 20-25 tonne front end loaders.

Advantages

- ✓ Strong and compact design
- ✓ High clearing capacity
- ✓ Long casting distance
- ✓ Perfect overview
- ✓ Low fuel consumption
- ✓ Quick coupling concept
- ✓ Flexible
- ✓ Reduced weight

UTV 530 Performance Line

OPTIONS

- ✓ Hydraulically adjustable forward flap
- ✓ Hydraulic slewing ring – 220°
- ✓ Extension of impeller housing's outlet
- ✓ Loading chute with hydraulically adjustable flap
- ✓ Support wheels
- ✓ Working lights
- ✓ Engine heater and battery charger 220 V
- ✓ NATO-socket

TECHNICAL DATA

UTV 530 PERFORMANCE LINE

UTV 530
