

SOPPEC Tracing PRO Floor line marking

Product codes:

Reference: 1520000

EAN13: -

UPC: -

Product attributes:

RAL color : RAL 1023, RAL 3020, RAL 5017, RAL 6024, RAL 7045, RAL 9016, RAL 9017

Product features:

Product Type: Line marking spray
Type of paint: Non fluorescent paint
Marking time: 12 months
Volume: 750 ml
Packaging: Box of 6 aerosols
Brand: SOPPEC

Product short description:

The **SOPPEC TRACING® PRO Floor Line Marking Paint** was designed to secure workplace through safety signage. It allows you to make your markings outdoor as well as indoor, with high quality and exceptional resistance to clogging. It guarantees a precise spray and a high flow rate over a longer distance than its competitors, and allows you to carry out your markings more quickly and at a lower cost.

Product description:

**DURABLY VISIBLE,
THE SOPPEC TRACING PRO FLOOR LINE MARKING PAINT
DOES NOT CLOG UP!**

The **SOPPEC TRACING® PRO Floor Line Marking Paint** was designed to secure workplace safety through safety signage compliance, for **yourself**, your **employees**, your **visitors** and **clients**.

**SOPPEC TRACING® PRO FLOOR MARKING PAINT
HAS MANY ADVANTAGES**

It offers the possibility to carry out markings on the ground **outside** as well as **inside**.

It offers **exceptional quality** and **resistance to clogging**.

It guarantees **sharp edges** and a **high flow rate** over a **longer distance than its competitors**.

It allows you to **make your markings more quickly** and **at lower cost**.

Stop spending up to € 35 excl. VAT per aerosol, when SOPPEC TRACING® PRO provides you with a higher level of performance for 30% less!

The SOPPEC PureSPRAY™ system stands for the very best of TECHNIMA's expertise within the area of aerosol marking paint.

It is the very unique combination of a paint formulation with more pigments, the exclusive design of the combo « aerosol + spray nozzle + trolley » which secures a pure line, with no need of flanges or other tweaks to keep the line edge quality under control.

The trolley does not require cleaning after use.

The pressure level within the aerosol can along with the spray system were designed to provide fast and high coverage marking. The Optimal Application Speed of the **SOPPEC PureSPRAY™** system is the highest on the market.

Using the **SOPPEC DRIVER™** application trolley and the **SOPPEC TRACING® PRO** paint spray cans, you proceed with 500 m within 30 minutes, and you don't have to clean the equipment.

The SOPPEC PureSPRAY® system is providing you with a precise marking with no side-spray.

It is **40% faster** to use than its closest competitor.

FIND OUT THE BENEFITS

OF SOPPEC TRACING PRO FLOOR FLOOR LINE MARKING PAINT

THE FASTEST FLOOR LINE MARKING PAINT ON THE MARKET

Operated with the **SOPPEC DRIVER™ application trolley**, the **SOPPEC TRACING PRO™ aerosol marking paint** provides you with optimal flow and coverage for a 1,2 km/h application speed (or **10 m within 30 seconds**).

As it **dries quickly**, it stands today as the **fastest aerosol line marking system on the market** to apply sharp edge lines with no need to clean the trolley.

OPTIMAL APPLICATION SPEED

90 M LENGTH COVERAGE

TOUCH-DRY

LIGHT TRAFFIC-READY

THE EXCLUSIVE FORMULA DEVELOPPED WITHIN OUR LABORATORY IN NERSAC (FR) SECURES AN OUTSTANDING PERFORMANCE :

- **Resistance to clogging far ahead of all competitors.**
- **90 m coverage within 75 mm line width with 1 aerosol can** , on smooth surface (concrete) at optimal speed.
- **Brighthness, contrast, durability**, it is an industrial grade marking paint that withstands the most severe conditions (UV, solvents, pedestrian, car or forklift truck traffic) indoor or outdoor
- The pre mounted exclusive and **versatile spray nozzle** fits on the SOPPEC DRIVER™ application trolley or can be used by hands to spray on stencils
- **Formula certified NSF (food storage)** and guaranteed free of Xylene, chlorinated solvents and aromatic compounds.
- Delivered as **750 ml net aerosol cans**, the optimal content for efficient line marking execution.
- Recognizable by its **transparent cap and colored collar**, its packaging allows you to always **identify the color contained in the aerosol.**
